

QUICK Lessons

The e-Learning platform for creating **online courses fast and easy**

It's time to review your production concepts

QuickLessons is a full featured online platform that allows you to create superior e-Learning content with no need for programming, designing skills or software installation. Using a wide library of dynamic instructional templates, authors can produce professional-looking courses with smaller deadlines and budget.

There are also many categorized images, animated characters and navigation interfaces available, to which you can add your own touch of style by inserting your own logo, animations, audios and videos in many different color schemes.

And, if you want to weigh up your students' knowledge you can also include exercises and evaluations with random questions. Once it's done, you'll be able to download the online, offline or SCORM compliant versions of your course.

Main Advantages:

- 100% web-based
- Easy and friendly interface
- Easy editing and content updating
- Library of flash-based templates for content, exercises and evaluations
- Images and customizable characters
- Easy addition of extra-resources and navigation elements
- Instant preview
- No programming needed
- LMS, Internet, CD and DVD Publishing
- SCORM compliance

"The time-to-market of new courses has accelerated considerably thanks to our new production standards, which are 40% higher with QuickLessons."

- Andre Akagi, CIO of Portal Educação.

Take a look at QuickLessons' main features

Easy and friendly interface

All you need to create your course with QuickLessons is close at hand. Select an interface. Include your company's logo. Choose your favorite characters and apply a color schemes and style. Seek the most suitable templates. Insert texts, media, exercises, evaluations and games. Download you final work and publish it. Only with QuickLessons you can create courses in Flash as easy as web browsing.

100% web-based and with no installation required

Now you can create online courses from anywhere. With QuickLessons you don't need to think about servers, operational systems, databases, security copies or upgrade packages anymore!

Easy editing and content updating

With QuickLessons, content can be updated at any time. It's as easy as editing a text document. The looks of your course can also be changed whenever you want.

Exercises and Evaluation

It is easy to create exercises and evaluations using varied templates. Each course or learning object can have question pools classified by type, complexity level and so on. The evaluation can be customized to your needs. You can even define random questions, feedback and grade options.

Different publishing options

QuickLessons allows you to download your courses in various formats to publish on a CD/ DVD, Intranet or Internet site and even to any SCORM and AICC compliant LMS.

Templates, media, characters

QuickLessons allows you to reuse all media and objects. Use our libraries of templates, characters and media to create many different courses. You can also add your own media or order new customized ones.

Quiz Pack

Boost your library with interactive games based on the best practices of instructional design! With QuickLessons' Quiz Pack you can impress your final users, adding more action to their training!

Learning Resources

With QuickLessons you can enrich your course by adding extra resources such as table of contents, FAQ and glossary.

QuickLessons helps you with:

- Corporative procedures and politics
- Communication and job routines
- Technical trainings
- Operational and Marketing initiatives
- Launching new products
- Software and system application trainings
- Certification Assessments
